

Multibeam Appoints Patterning and Lithography Expert, Andre Linden, as Senior VP of Sales

SUNNYVALE, Calif., Feb.12 2026 – [Multibeam Corp.](#) today named semiconductor capital equipment executive, Andre Linden, as Senior Vice President of Sales. A patterning and lithography expert, Andre has spent 25+ years scaling high-performance sales organizations to deliver innovative technologies to manufacturing leaders in international markets. He succeeds Roger Van Art who left for new opportunities.

Andre will drive Multibeam’s global customer engagement strategies, working closely with the company’s product development team to align its multi-column E-Beam Lithography (EBL) solution with current and emerging applications. He arrives as EBL’s prominence as an alternative lithography solution intensifies. Already demonstrating [value for quantum computing applications](#), EBL’s reach extends to enabling the purpose-built chips behind the AI revolution, as well as photonics devices and the next generation of heterogenous integration. Multibeam stands at the center of the chip trends, leading with a one-of-a-kind multiple-column EBL system engineered for ultra-high productivity, maximum flexibility, and unbeatable cost of ownership.

“Andre brings exceptional lithography expertise to Multibeam and a record of helping customers leverage novel technologies to process diverse applications with tight market windows. He has built successful sales organizations across key markets, establishing trusted relationships with industry leaders while consistently delivering revenue growth. Andre’s entrepreneurial approach and technical depth make him an ideal fit for Multibeam at this pivotal stage, and we’re excited to welcome him to the team.”

~ Dr. Ken MacWilliams, President, Multibeam

“Multibeam combines the attributes of a small company -- nimble, innovative and fast-moving, with big company advantages – expert team developing advanced technologies for high-growth markets. I watched the company install its first breakthrough production system when emerging applications were escalating demand for a lithography solution with EBL’s advantages. Now, I’m proud to join this impressive team and build a world-class sales infrastructure to enable global semiconductor leaders with this unique technology.”

~ Andre Linden, Senior VP of Sales, Multibeam

About Andre Linden

Before Multibeam, Andre spent more than two decades at RAITH, a market and technology leader in maskless nanofabrication systems. While there, he held leadership positions with increasing responsibility in the U.S., Germany, and Hong Kong. At RAITH America, he held sales, marketing and international business development roles. Most recently, as VP of Sales and Marketing, he led sales strategy and execution, consistently exceeding revenue targets while helping to shape the product roadmap to address customers' technical and economic priorities. In his early tenure at RAITH, he built and directed the sales and marketing organization for the company's Asia/Pacific region from Hong Kong, driving revenue growth by 400% over five years through strategic market development and high-performance team building. Andre holds a Degree in Engineering with a specialization in Microsystems from the University of Applied Sciences in Muenster, Germany. He earned a Certified Project Manager qualification from Otto von Guericke University in Magdeburg, Germany.

Andre will lead Multibeam's presence at [Chiplet Summit 2026](#) in Santa Clara, Calif. next week. He will be featured as a panelist on the panel titled "Is it time for optical interface yet?" moderated by Amy Leong on Thursday, February 19th at 9am.
